Data Science & Machine Learning

Kolkata, India | +91 7003847541 | vishakhadamani408@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

AI/ML undergraduate with hands-on experience building production-ready data applications using Python, Flask, Pandas, and scikit-learn. Built and deployed a stock analysis platform integrating technical indicators with LLM-generated insights and developed an HR analytics dashboard for 1,400+ employee records. Solved 200+ DSA problems on LeetCode/GeeksForGeeks.

TECHNICAL SKILLS

Languages	Python, SQL, C, HTML, CSS
Data & ML	NumPy, Pandas, Scikit-learn, Seaborn, Matplotlib, Plotly
Frameworks & Tools	Flask, Git/GitHub, MySQL, SQLite, Render
APIs & Integration	REST APIs, Google Gemini API, yfinance
Core CS	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Concepts	Data Preprocessing & Cleaning, Feature Engineering, Data Visualization

PROJECTS

Stock Analyzer Web App

Python · Flask · yfinance · Google Gemini API · Matplotlib · Render — [GitHub](#)

- Built and deployed a full-stack stock analysis tool generating rule-based BUY/HOLD/SELL signals from RSI and MACD technical indicators, using yfinance for real-time market data.
- Designed an interactive Matplotlib visualization layer so users can interpret momentum and trend-reversal signals at a glance.
- Integrated the Google Gemini API to auto-generate natural-language investment insights and risk summaries from computed signals.
- Reduced repeat-query response time with Flask-Caching and shipped the app to production on Render.

HR Data Analysis Dashboard

Python · Pandas · Plotly · scikit-learn (Random Forest) — [GitHub](#)

- Built an interactive Plotly dashboard analyzing workforce data for 1,400+ employees, with rule-based KPIs (attrition rate, promotion rate, retrenchment rate) from raw HR records. Cleaned workforce data and performed EDA and feature engineering in Python (Pandas).
- Trained a Random Forest classifier on the same dataset to predict employee attrition, applying class weighting to correct for severe class imbalance — improved recall from 0.08 to 0.60, cutting missed at-risk employees.
- Used feature-importance rankings from the model to identify top attrition drivers (e.g. tenure, overtime, promotion history).

EDUCATION

B.Tech in Computer Science (AI & Machine Learning) — Techno Main Salt Lake, Kolkata

2023 – 2027

GPA: 7.8 / 10

Class XII — Mahadevi Birla World Academy, Kolkata

2023

Percentage: 80.2%

Class X — Mahadevi Birla World Academy, Kolkata

2021

Percentage: 94%

CERTIFICATIONS

- [CS50: Introduction to Computer Science — Harvard University \(2025\)](#)

ACTIVITIES & LEADERSHIP

- Institution Innovation Council (IIC), 2024–2025 — Co-organized innovation/entrepreneurship workshops; mentored junior students on coursework and problem-solving.
- Google Arcade Facilitator Program, 2024 — Achieved Champion tier, completing all assigned Google Cloud labs.
